Film: "LORDS OF NATURE" (60 min, Karen Anspacher-Meyer and Ralf Meyer, 2009) Wolves and cougars, once driven to the edge of existence, are finding their way back -- from the Yellowstone plateau to the canyons of Zion, from the farm country of northern Minnesota to the rugged open range of the West. This is the story of a science now discovering top carnivores as revitalizing forces of nature, and of a society now learning tolerance for beasts they once banished.

Narrated by
Peter Coyote.
