MONEY DRIVEN MEDICINE

(86 minutes, Jigsaw Productions & Gabriel Film Group, 2009)

This illuminating documentary will systematically help viewers distinguish between the structural changes we need and sham reform proposals; it will explain why a sound, sustainable medical infrastructure is crucial, not just to their personal futures, but to the economy and society as a whole. America's healthcare crisis is a matter of national life and death.

Dr. McLanahan is Associate Professor Emeritus at the University of Washington School of Medicine, and surgeon emeritus at Pacific Medical Center, and will join us for a discussion following the film. (Event is FREE and open to the public! ...Donations are kindly accepted).
