STOP TRIDENT

There are 2,364 Nuclear Warheads located 20 miles West of downtown Seattle. The eight Trident submarines at Bangor are likely to be used first in any nuclear attack: either in an isolated "tactical" assault, or a larger "strategic" nuclear attack. Bangor is also likely to be a first target. No size of nuclear weapon can be used safely, regardless of how small. Nuclear weapons are in violation of International Law. Work with Ground Zero Center For Nonviolent Action to Stop Trident and abolish all nuclear weapons.
